

## Create and Execute Student Daily Tasks DAG

Create a New DAG File

```
cat > student_daily_tasks_dag.py
```

Write the DAG Code

```
from airflow import DAG
from airflow.operators.python import PythonOperator
from datetime import datetime
```

```
def wake_up_task():
    print("Student woke up at 6 AM")
```

```
def exercise_task():
    print("Student completed morning exercise")
```

```
def attend_class_task():
    print("Student attended Python class")
```

```
def complete_assignment_task():
    print("Student completed Airflow assignment")
```

```
def sleep_task():
    print("Student went to sleep at 10 PM")
```

```
with DAG(
    dag_id="student_daily_tasks_dag",
    start_date=datetime(2025, 1, 1),
    schedule="@daily",
    catchup=False
) as dag:
    t1 = PythonOperator(
        task_id="wake_up_task",
        python_callable=wake_up_task
    )
    t2 = PythonOperator(
        task_id="exercise_task",
        python_callable=exercise_task
    )
    t3 = PythonOperator(
        task_id="attend_class_task",
        python_callable=attend_class_task
    )
```

```

t4 = PythonOperator(
    task_id="complete_assignment_task",
    python_callable=complete_assignment_task
)
t5 = PythonOperator(
    task_id="sleep_task",
    python_callable=sleep_task
)

t1 >> t2 >> t3 >> t4 >> t5

```

## Enable and Trigger the DAG

1. Search for:

**student\_daily\_tasks\_dag**

2. Turn ON the toggle
3. Click  **Trigger DAG**
